Both founders of Rasputin and Black Armory realized that the demilitarization of mankind during the gold age represented a danger if enemies arrived from outside the system. Eventually all other members of the group perished with ADA-1 remainder. [4] She ended up hiding in the last city, remaining secret and suspicious of any light of light, even the guardians. To avoid this, both parties have secretly begun to produce weapons for mankind to use if they were attacked. Clan's matriarchs, Henriette Meyrin, Helga Rasmussen and Yuki satou, believed that Earth is about to be invaded by some extraterrestrial enemy and agreed to manufacture and store advanced firearms to ensure the survival of their families. [1] They built several words and were selling some weapons to compensate for their expenses; Helga Rasmussen, previously from Clovis Bray, ran the business side of things. [2] Arsenal's precautions failed when the real collapse began; Their superior firearms provided little protection against the darkness. A titan with black arsenal technology. The goal of Armory Black is very similar to the subroutine of the Dvalin Forge of Rasputin. Another vision of the black arsenal. History [Edit] The Meyrin House Family Crests, Rasmussen Clan and Satou Tribe The Black Arsenal was founded at the end of the golden age by three families: French house of Meyrin, Clan Rasmussen, and Japanese tribe Satou; Each bringing elements of their native heritage to the arsenal drawings. After one of the attacks by some monstrous minion of the darkness, the group had to abandon their hiding place and leave their forts back. This in other words would have given an exogen the ability to become a mobilized forge. [5] [6] During collapse, Henriette Meirin in an effort to save her fatally injured daughter carried her conscious daughters into an experimental exo frame to become ADA-1. [7] At some point, Siviks, lost for no scorning the Armory Papers to seek secrets from the NIOBE project, an initiative to develop and produce prototypes of black arsenal. [8] Later Ada-1 expressed his gratitude in relation to the guardian to for The Obsidian Accelerator, an absent exo update that allowed your weapon update skills using Obsidian radiance. Henriette's daughter Adelaide was seriously injured in the attack, and Henriette agreed with Yuki's proposal satou of uploading Adelaide's conscience into an experimental exo body, creating ADA-1. [3] ADA-1 served as a mobile forge, being able to create and improve the weapons of black arsenity with naked hands. Unfortunately, ADA-1-produced weapons ended up being the banana of the group in the collapse world, already attracted various thugs and thieves, including some resurrected prototies.
